

# German Rifle Grenades & Rifle Grenade Launchers

by Michael Heidler

The book shows the German developments and their use in both World Wars and the early post-war time. Described are the different rifle grenades (incl. experimental grenades), the launchers and special weapons for launching the grenades (Mauser grenade rifle, MG 151, Granatbüchse 39, 2-cm-Flak, etc.), the use in foreign countries and copies made by other nations (Norway, Japan, Italy, Finland, Great Britain, USA, etc.).

Many interesting illustrations show the details of original grenades and weapons. Included are also lists of manufacturers, excerpts and drawings from patents.

**Please note: The language is German only !!**

- 432 pages, hardcover
- 764 illustrations (colour & black/white)
- Weight 2.65 lb
